SUBJECT: ENERGY/WATER CONSERVATION AND RECYCLING OF SOLID WASTE

Energy/Water Conservation

The Board of Education recognizes the importance of energy and water conservation and is committed to the analysis, development, and initiation of conservation measures throughout the District for the purpose of reducing energy consumption, particularly in these times of declining levels of natural energy resources and increasing cost of these resources. The Board will maintain an aggressive and responsible program to reduce consumption of energy by its facilities and to provide education on the conservation of energy.

Recycling

The Superintendent will develop a program for the source separation and segregation of recyclable or reusable materials in the District. This District-wide recycling plan shall include:

- a) A conservation education program to teach students about their social responsibility for preserving our resources, and involvement of all students and personnel in a comprehensive effort to reduce, reuse and recycle waste materials;
- b) A concerted effort to purchase recycled items and biodegradable rather than non-biodegradable products;
- c) Separation of waste into appropriate categories for the purpose of recycling, including mercury-added consumer products; and
- d) A cooperative effort with community recycling programs.
